Can be ironed at a max. temperature of 150 degrees if it is made of a blend (wool and polyester or viscose). Use a damp cloth while ironing.

It can be dry cleaned, but only with hydrocarbons, tetrachloroethylene or trichlorofluoromethane.

Thread: white sewing thread
Elastic: elastic - black

Produced in: Hungary

The masks are made in Hungary!

Please note that this product is not a medical device and it does not guarantee protection against the coronavirus!

The use of these masks reduces the number of particles released into the air by coughing and sneezing, which is of a paramount importance when staying in enclosed spaces. In addition it can help reduce the involuntary touching of the nose and mouth.

The biggest advantage of our reusable fabric masks is that they can be used for months with proper care and sterilisation, thus making them more cost-effective and environmentally friendly than disposable masks.

Use:

Place the properly cleaned mask in front of the mouth and nose with clean hands.

Attach the mask to the ears by the elastic on both sides.

Then adjust the folds to cover the nose and mouth as much as possible.
